

Testing types:

Load testing: Check whether 500 users can register on the site simultaneously.

Stress testing: Verify if the Comfy site works when 15,000 users place orders simultaneously.

Recovery testing: Check if the page reloads after the 404 not found error.

Volume testing: Check whether there will be no data loss when the database is double.

Scalability testing: Check the site's response time when there will be 10 and 1000 users.

Soak testing: Check how the site will behave when 3,000 users browse the products within 12 hours.

UI testing: Check whether the "Catalog" drop-down menu is on the right side of the site's home page.

Usability testing: Check if a prompt appears when the user enters a password in the signup form.

Configuration testing: Check if images are displayed correctly on Google Chrome and Opera.

Portability testing: Load the site on Android in the Opera Mini browser and check if the site is displayed correctly.

L10N testing: Change the site's language to English and check that all the site's functionality will be in English.

I18N testing: Switch the language to eng and check whether the product delivery date on the Delivery page will correspond to the American format.

Re-testing: Enter invalid data in the e-mail field in the registration form.

Regression testing: Add [Смартфон Samsung Galaxy S23 8/128Gb Black \(SM-S911BZKDSEK\)](#) to the cart.

Sanity testing: Try to enter your account by entering valid data in the email and password fields.

Smoke testing: Try registering on the Comfy website using a Google account.

Security testing: Enter your password in the "password" field and check if it converts to dots.

End-to-end testing: Add to favorites LG 43UQ75006LF TV by going to the Comfy website and entering the name of the TV in the search box.
